Weekly 360 Report

Week of Nov 2, 2026 · data as of Nov 3, 2026 · Technical Trading Scorecard

---

PM Summary

As of Nov 3, 2026

- **Weekly Equity Attribution vs. Benchmark** (Oct 27–Nov 3)**:**

  US PIM

EQUITY PIM 1W	S&P 500 1W	OUTPERFORMED
-1.43%	-1.99%	+0.56pp

  Since Jun 30: Outperformed +1.56pp (US PIM +2.49% vs. S&P 500 +0.93%, to Nov 3)

  YTD: Underperformed −9.51pp (US PIM +1.06% vs. S&P 500 +10.57%, to Nov 3)

  CAD PIM

EQUITY PIM 1W	S&P/TSX 1W	OUTPERFORMED
-1.75%	-1.77%	+0.02pp

  Since Jun 30: Underperformed −1.72pp (CAD PIM +0.21% vs. S&P/TSX +1.94%, to Nov 3)

  YTD: Outperformed +4.02pp (CAD PIM +16.06% vs. S&P/TSX +12.04%, to Nov 3)

  Equities only; daily chain-linked price returns.

- **Holdings Breaking Down – To Address** (REVIEW = chart breakdown, more than 3% below a falling 200-day average; WATCH = Unrealized loss > 10%; REVIEW listed first)**:**

  US PIM

  REVIEW **CCO** · Cameco, uranium miner · wt 1.40% CHART BREAKDOWN
  – Below a falling 200-day average, 46% off its high; +225.1% vs. cost.

  REVIEW **HOOD** · Robinhood, online brokerage · wt 1.13% CHART BREAKDOWN Unrealized loss > 10%
  – Below a falling 200-day average, 42% off its high; −38.5% vs. cost.

  REVIEW **AEM** · Agnico Eagle Mines Limited · wt 2.01% CHART BREAKDOWN
  – Below a falling 200-day average, 33% off its high; +94.7% vs. cost.

  WATCH **MTUM** · iShares US Momentum ETF · wt 1.80% Unrealized loss > 10%
  – Down 12.1% vs. cost; chart not broken.

  WATCH **TSLA** · Tesla, electric vehicles · wt 0.87% Unrealized loss > 10%
  – Down 16.5% vs. cost; chart not broken.

  CAD PIM

  REVIEW **NXE** · NexGen Energy, uranium mine developer · wt 1.38% CHART BREAKDOWN Unrealized loss > 10%
  – Below a falling 200-day average, 41% off its high; −17.9% vs. cost.

  REVIEW **ABX** · Barrick, gold miner · wt 1.87% CHART BREAKDOWN Unrealized loss > 10%
  – Below a falling 200-day average, 26% off its high; −13.3% vs. cost.

  WATCH **APTX** · Apotex, generic drugmaker · wt 0.89% Unrealized loss > 10%
  – Down 12.8% vs. cost; chart not broken.

  REVIEW: chart breakdown = more than 3% below a falling 200-day average. WATCH: Unrealized loss > 10% (vs. cost), with no chart breakdown. If both apply, REVIEW with both tags. Within each status, ranked by severity (drawdown, lag vs. index, trend). % vs. cost = RBC PIM book cost vs. the last full close (CTVA cost split with the VYLR spin-off). Weight = % of PIM.

- **Macro:**
  - – **Overall Risk Stance:** RISK-OFF · Liquidity: BEARISH · Credit: NEUTRAL · Volatility: BEARISH · Economic growth: FLAT · Earnings growth: FLAT. Volatility: hard VIX veto ON (VIX 20.83, 87th 3-yr percentile, up 34% in 21 days), so equity is capped at 45%.

- **Dealer & Systematic Flows:** Backdrop NEGATIVE
  - – **Gamma:** NEGATIVE Dealers are magnifying moves (positive = dealers sell strength/buy weakness, dampening vol; negative = buy strength/sell weakness, amplifying).
  - – **Systematic:** Funds BEARISH.
  - – **Vol:** Short-term 1M volatility CROSSED ABOVE 3M: added downside risk.
  - – **Net:** Rallies may fade and drops run further; keep risk tight.

- **Sentiment:** Overall NEUTRAL ▼ (composite 39th 3-yr %ile, as of Nov 3)
  - – **Surveys:** AAII bulls 37.8% ▼ (4W ago 40.3%; 43rd 3-yr %ile, Neutral) · NAAIM exposure 79.7 (4W ago 79.7; 34th 3-yr %ile, Neutral).
  - – **Fear & Greed:** CNN Fear & Greed 19 EXTREME FEAR ▼ (1 week ago 33, 1 month ago 38); context only.
  - – **Net:** Investors are neither crowded long nor washed out, so sentiment gives no contrarian signal either way; the risk call rests on the other pillars. Short-term mood (Fear & Greed) is in extreme fear, which tends to favour rebounds more than further selling.

- **Style Factors:**
  - – **1M winners:** VALUE LOW BETA SMALL CAP → DEFENSIVE / RISK-OFF tilt; matches the negative flows; favours steadier, lower-beta names over high flyers.

- **Sector Rotations:**
  - – **S&P 500:** MIXED Cyclicals (Discretionary, Financials, Industrials, Materials) and defensives (Health Care, Real Estate, Staples, Utilities) both lead.
  - – **TSX:** DEFENSIVE Defensives (Comm Services, Health Care, Real Estate, Staples, Utilities) lead; cyclicals limited to Discretionary, Financials, Industrials.

- **Market Breadth and Volume:**
  - – **Breadth:** SUPPORTIVE Most stocks are participating (64% of the S&P 500 above their 200DMA).
  - – **Volume:** NEUTRAL Rallies come on light volume while sell-offs see heavier trading, so conviction is thin. That fits a cautious backdrop: the rally is broad but not convincingly backed.

- **PIM Risk Posture:**
  - – **US PIM:**
    - – **Beta:** PORTFOLIO BETA 0.94 vs. S&P 500; 43% of equity weight (13 of 28 holdings) has beta below 1.
    - – **Posture:** LEANING DEFENSIVE APPROPRIATE Below-market risk with a balanced offensive/defensive mix. That suits a cautious backdrop (flows are negative and the style tilt is risk-off), though breadth is supportive.
    - – **Sector fit:** Holds 8 OF 9 S&P 500 sectors outperforming the market; no exposure in UTILITIES; underperforming sectors held: Info Tech, Comm Services. REVIEW LAGGARDS
    - – **In outperforming sectors:** 70% OF EQUITIES sit in sectors outperforming the S&P 500 (Health Care 21%, Industrials 11%, Cons Staples 10%, Financials 9%, Cons Discretionary 7%, Materials 6%, Energy 5%, Real Estate 2%)
  - – **CAD PIM:**
    - – **Beta:** PORTFOLIO BETA 0.93 vs. TSX; 56% of equity weight (12 of 20 holdings) has beta below 1.
    - – **Posture:** DEFENSIVE APPROPRIATE Below-market risk with more defensive than offensive names. That suits a cautious backdrop (flows are negative and the style tilt is risk-off), though breadth is supportive.
    - – **Sector fit:** Holds 7 OF 10 TSX sectors outperforming the market; no exposure in COMM SERVICES UTILITIES REAL ESTATE; underperforming sectors held: Materials. REVIEW LAGGARDS
    - – **In outperforming sectors:** 82% OF EQUITIES sit in sectors outperforming the TSX (Energy 23%, Financials 21%, Industrials 15%, Info Tech 7%, Cons Staples 6%, Cons Discretionary 6%, Health Care 2%)

  Beta: portfolio beta and holding betas from the HQ Fundamentals Scorecard PIM view (same beta as the posture rule and PIM Attribution card; holdings as of Nov 3, 2026); US vs. S&P 500 (SPY), CAD vs. TSX (XIC). Index funds (VOO, XIC) count as beta 1.0, not below 1. Names without a beta are excluded. Outperforming sectors: % of each equity sleeve (same holdings date) in sectors beating the equal-weighted index on the Sector Rotation charts (Strong Relative + Leading But Decelerating); every stock mapped to its GICS sector, sector ETFs (XLV, RSPR) to their sector, broad ETFs (VOO, MTUM, CIBR, XIC) split across sectors by their holdings.

Generated from this report's own data each build. Technical read, not a recommendation.

Global Macro Weather Model

As of 2026-11-03

OVERALL MACRO REGIME · MOST CRITICAL SIGNAL

Risk-off

2 red · 3 amber · 0 green signals

● Liquidity	● Credit	● Volatility	● Economic Growth	● Earnings Growth
Bearish	Neutral	Bearish	Flat	Flat

Plain English: the big-picture backdrop for stocks. Mostly amber = no strong tailwind or headwind. Trend lines: last 3 months, weekly 3-yr percentile score (−1 to +1, dashed = 0), each segment coloured by that week's vote.

Tactical Asset Allocation

As of 2026-11-03

TAA REGIME · MOST CRITICAL SIGNAL

Risk-off

Model equity target 45%

Range 45–75% · neutral 60% · actual PIM equity: US 62%, CAD 61%

Risk direction, last 3 months (one square per week)

60%	60%	60%	60%	60%	60%	60%	▼55%	55%	▼50%	▲52.5%	▲60%	▼52.5%	▼45%
Aug				Sep				Oct					Now

🟥 Risk-off 🟨 Mixed 🟩 Risk-on · of 14 weeks: 5 Risk-off, 9 Mixed, 0 Risk-on · % in each square = that week's model equity target (▲/▼ = up/down vs. the prior week)

Plain English: how much of a balanced portfolio the model would hold in stocks right now (60% = neutral). Each square is one week, coloured by that week's regime; mostly amber = no strong push either way.

Equity Risk Orientation

As of 2026-11-03

OVERALL STYLE CALL · MOST CRITICAL SIGNAL

DEFENSIVE

Investors are favouring safer, steadier names. Net score -2.5

Defensive signals: Value, Low Beta, Momentum Out · **Offensive:** Small Cap (new) · **Neutral:** —

Breadth	Volume

Plain English: on balance, are investors rewarding safe or risky stocks? Rule: the 1-month winner of each of the four US pairs in 'Equity Style Factors' (Growth/Value, High/Low beta, Momentum, Small/Large) scores +1 if risk-on (Growth, High beta, Small cap, Momentum in), −1 if defensive (Value, Low beta, Large cap, Momentum out), 0 if even. Weight 1.0 if the 3-month trend agrees, 0.5 if new. Net ≤ −1.5 Defensive, ≥ +1.5 Offensive, otherwise Neutral. Breadth and Volume from the Risk Regime Scorecard.

Equity Style Factors

As of 2026-11-03

THE MARKET IS REWARDING VALUE LOW BETA SMALL CAP

OUT OF FAVOUR ↓ MOMENTUM

Based on the last month, checked against the last 3 months. Each pill names the side that won and by how much (relative return of one ETF vs the other).

US STYLE FACTORS

Factor (pair)	1 month	3 months
Growth vs Value VUG vs VTV	VALUE +11.8%	VALUE +6.2%
High beta vs Low beta SPHB vs SPLV	LOW BETA +18.7%	LOW BETA +8.7%
Momentum MTUM vs SPY	MOMENTUM OUT +11.5%	MOMENTUM OUT +8.4%
Small cap vs Large cap IWM vs SPY	SMALL CAP +1.4%	LARGE CAP +5.0%

🟩 Risk-on winner (Growth, High beta, Small cap, Momentum in) 🟥 Defensive winner (Value, Low beta, Large cap, Momentum out)
⬜ Even (gap <0.5%) / no clear winner Pill shade: light <2%, medium 2–5%, solid >5%.

Headline: each pair's 1-month winner; if 1 month is EVEN, the 3-month winner is shown. EVEN = gap under 0.5%. Data: Yahoo Finance adjusted closes, pulled 2026-11-03 17:37 PT.

Dealer & Systematic Flows

As of 2026-11-03

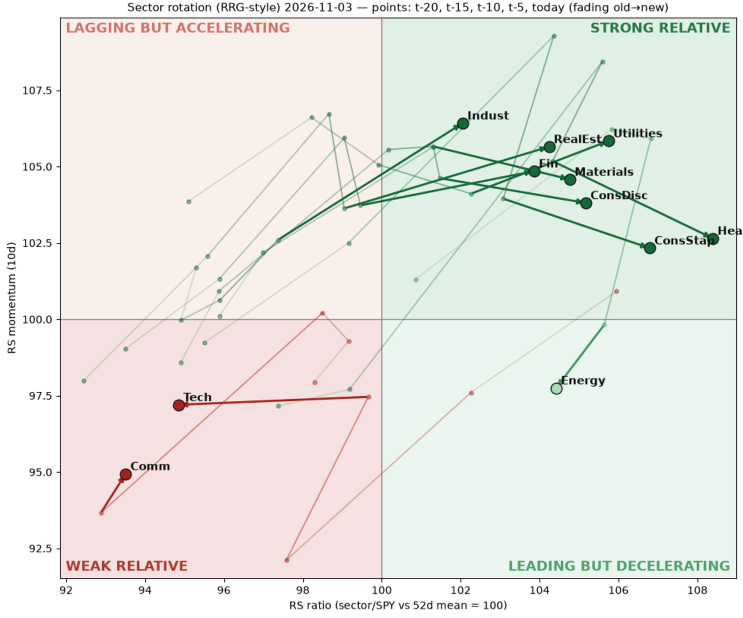
SPX Gamma Exposure	Systematic Flow Risk	SPX Realized Vol
Negative	Bearish	Risk-off
GEX flip 7,685 vs SPX 7,569	CTA positioning ~10	1M 11.5% · 3M 9.9%

Plain English: how big trading desks and rules-based funds are positioned. Bearish flow risk = selling could speed up a pullback. Source: Hedgeye / Tier1 Alpha.

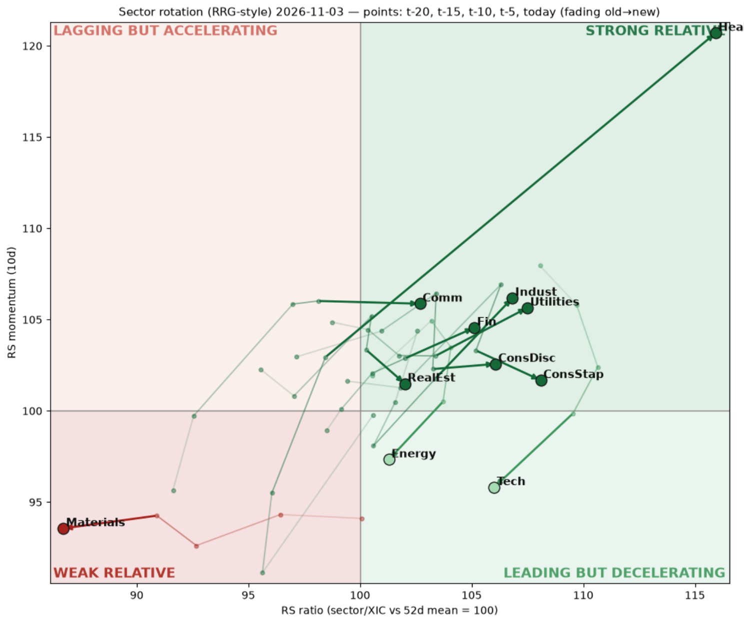
Sector Rotation

As of 2026-11-03

S&P 500 · 2026-11-03



S&P/TSX Composite · 2026-11-03



Plain English: **Strong Relative** top right, outperforming and gaining · **Leading But Decelerating** bottom right, outperforming but momentum fading · **Lagging but Accelerating** top left, underperforming but momentum improving · **Weak Relative** bottom left, underperforming and losing momentum. Tails show the last month (weekly points). Method, both charts: equal-weight sector vs equal-weight index, 52-day relative-strength ratio, 10-day momentum.

Thematic Rankings

The 10 strongest and 10 weakest themes and sectors by Rel Momentum, ranked together. The Accel arrow shows whether each is speeding up (▲) or slowing (▼).

Themes and the 11 US SPDR sector ETFs are scored on the same basis. Rel Momentum = 0–100 rank of each ETF's returns versus the other 95 thematic, sector and factor ETFs (1W 20%, 1M 35%, 3M 30%, 6M 15%). ▲/▼ = Accel/Decel: last month's return versus its 3-month monthly pace. Δ 1M = change in Rel Momentum vs a month ago. US PIM / CAD PIM = stocks/ETFs held in the US or Canadian PIM account that sit in that theme (Thematic ETF Scorecard theme mapping); for sector rows, every holding in that GICS sector from the PIM Attribution data, excluding broad ETFs (VOO, MTUM, CIBR, XIC). As of 2026-11-03.

Real Estate	—	0.3%	1.2%	-1.0	Strong Relative
Energy	ENB · CNQ · SU · PPL · NXE	23.1%	16.8%	+6.2	Leading But Decelerating
Info Tech	SHOP	7.1%	8.5%	-1.4	Leading But Decelerating
Materials	NTR · TECK/B · WPM · ABX	18.0%	16.1%	+1.9	Weak Relative

Stocks are 61% of the account; 39% is cash and bonds.

RRG columns (as of 2026-11-03 US / 2026-11-03 CA) come from the S&P 500 and TSX breadth scorecards: each sector equal-weighted vs the equal-weighted index. Rows are grouped by quadrant (strongest to weakest), then by PIM weight: **Strong Relative** top right, outperforming and gaining · **Leading But Decelerating** bottom right, outperforming but momentum fading · **Lagging but Accelerating** top left, underperforming but momentum improving · **Weak Relative** bottom left, underperforming and losing momentum.

Sector weights = % of each equity sleeve, with ETFs looked through to their sectors. Holdings = every stock and sector ETF held in that sector, largest first; broad ETFs spread across sectors (US: VOO, MTUM, CIBR; CAD: XIC) are counted in the weights but not listed. Over/under = PIM minus benchmark, in percentage points. Holdings as of the Nov 3, 2026 close; benchmark sectors as of 2026-11-02 (SPY / XIC holdings). Beta, tracking error and the offensive/defensive mix are from the PIM Attribution view of the HQ Fundamentals Scorecard (US excludes GLD/SLV).

Uptrends on a Pullback

To qualify, a stock must be in a confirmed uptrend (Trend Score 8–16wk confirmed Up for two weekly closes), have a Chart Health of 60 or more, have no bearish chart pattern and no falling earnings estimates, and have pulled back to near its entry price (no more than 5–10% above it).

Risk: lowest of the three groups, but any trend can break.

Downtrend Breakouts

To qualify, a stock must have been in a downtrend or below its 40-week average (about 9 months of prices) recently, have climbed back above that average within the last 8 weeks, show a turning trend (green ▲ or a newly confirmed Up), and have completed a bullish reversal pattern such as a double bottom, inverse head & shoulders, falling wedge or bull flag.

Risk: higher: new uptrends can fail. Stop level shown under the price.

Early Turns

To qualify, a stock must still be in a downtrend or have spent long stretches below its 40-week average, and show at least two early recovery signals: a green ▲ on the Trend Score, reclaiming or testing (within 3%) its 40-week average, or a bottoming pattern forming (double bottom, inverse head & shoulders or falling wedge).

Risk: highest: watch-list ideas, not confirmed turns. Keep sizes small and respect the stop.

Builds tracked: Oct 28, Oct 29, Oct 30, Nov 2, Nov 3. Status: NEW = on this build only; REPEAT = on 2+ builds in a row; DROPPED = off the list (final return = flag-date close to the close on the build it dropped). Prices: closes on each build date, Bloomberg sheet first, Yahoo where the sheet has no series (this build: Yahoo). Hit rate counts names still on the list that were flagged before this build (names new this build have no return yet). A name that leaves and returns restarts from its return date (marked re-flagged). A name that moves section is tracked separately in each. Lists (from the Thematic ETF scorecard, refreshed each build): US/CAD PIM = owned; US/CAD WL = watchlists, WL+ = Stephen adds; PAG US/CAD = RBC PAG US/Canadian Focus Lists (alt = alternates); GRNY = Fundstrat Granny Shots; ARKK = ARK Innovation; DFO = Duquesne Family Office. ETF = thematic ETFs/baskets holding the name (≥1%).
